WEEKLY ACTIVITY PLAN · BUILT FOR KIRAN

WEEKLY ACTIVITY & RECOVERY SCHEDULE

UPDATED

Gym, doubles badminton and dance in one week - sequenced so nothing steals recovery from your lifting, and muscle is protected while you cut. Optional sessions are included but clearly marked.

4 / week	2 + 1 opt.	2 + 1 opt.	2
GYM SESSIONS	BADMINTON (DOUBLES)	DANCE (ZUMBA)	FULL REST DAYS

MON	**Gym - Full Body 1** 2:30 - 5:30pm OPTIONAL **Dance (Zumba) #3** ~7:30 - 8:30pm
TUE	**Gym - Full Body 2** 12:00 - 2:30pm **Badminton (doubles)** 4:00 - 7:00pm
WED	**Full Rest** - OPTIONAL **Badminton (doubles) #3** 4:00 - 7:00pm
THU	**Gym - Full Body 3** 2:30 - 5:30pm **Dance (Zumba)** ~7:30 - 8:30pm
FRI	**Gym - Full Body 4** 2:30 - 5:30pm **Dance (Zumba)** ~7:30 - 8:30pm
SAT	**Badminton (doubles)** 4:00 - 7:00pm
SUN	**Full Rest** -

ACTIVITY KEY

Gym · Badminton · Dance · Full Rest · **OPTIONAL** = outlined, only if recovery is green

Times are blocks, not exact class times: gym blocks include travel and slack (the workout itself is ~70 min); badminton is your usual 4-7pm window with ~2 hr of play; dance is an evening 1-hr class - match it to your actual Zumba time.

01 Detailed Daily Schedule

Time blocks & why each day is sequenced this way

DAY	TIME BLOCKS	WHY THIS ORDER
Monday	Gym 2:30 - 5:30pm - **Full Body 1** (Quads, Chest & Back) OPTIONAL Dance ~7:30 - 8:30pm - **Dance #3**, easy intensity	*Pure gym day by default. Your heaviest quad day comes right after Sunday's full rest, with nothing else competing for leg freshness. The 3rd dance session is optional and must stay easy, because Tuesday's hamstring day and badminton follow.*
Tuesday	Gym 12:00 - 2:30pm - **Full Body 2** (Hamstrings, Back & Chest) Badminton 4:00 - 7:00pm - **Badminton** (doubles, ~2 hr play)	*Gym moves to midday so your 4-7pm badminton window stays free and you get a 1.5-4 hr gap. Gym always comes first, never after badminton. Hamstrings were just worked, so warm up properly and play lighter if they are very sore. (If midday gym is not possible, see the fallback note below.)*
Wednesday	Rest Full Rest (nothing scheduled) OPTIONAL Badminton 4:00 - 7:00pm - **Badminton #3**, relaxed doubles	*Mid-week reset before Thursday's quad day. The optional 3rd badminton session is the only place it fits without hurting a leg day, and only as a relaxed, ~1.5 hr social game. If you take it, Sunday becomes your only full rest day.*
Thursday	Gym 2:30 - 5:30pm - **Full Body 3** (Quads, Shoulders & Arms) Dance ~7:30 - 8:30pm - **Dance (Zumba)**	*Dance after gym with a 2+ hr gap. Zumba is choreographed and rhythmic, not reactive like badminton, so it tolerates tired legs far better. This is your busiest day: if energy is low at 7:30pm, dial dance intensity back rather than pushing through.*
Friday	Gym 2:30 - 5:30pm - **Full Body 4** (Single-Leg, Back Width & Grip) Dance ~7:30 - 8:30pm - **Dance (Zumba)**	*Same gym-then-dance pattern as Thursday. Dance sits here, not on Saturday, so Saturday badminton is the only extra that day and you are not stacking two activities back to back.*
Saturday	Badminton 4:00 - 7:00pm - **Badminton** (doubles, ~2 hr play)	*No gym today, so this is the one day you can spend energy freely. Eat a carb-containing meal 1-2 hr before playing, and a proper protein-rich dinner afterward.*
Sunday	Rest Full Rest (nothing scheduled)	*Resets you fully before Monday's heavy quad day. Protect this day. Light walking is fine.*

Fallback if Tuesday's midday gym is not possible

Move Tuesday's badminton to Wednesday and make Tuesday gym-only (2:30pm). You lose the mid-week full rest, but doubles is low-intensity and Thursday's legs still get ~24 hours. Then the optional 3rd badminton session moves to Sunday only if Monday's legs can afford it - otherwise skip it.

02 Optional Sessions, Load & Fuel

When to take the extras, and how to eat for them

How to decide on an optional session (check the morning of)

Use your Amazfit Helio's readiness, HRV, resting heart rate (RHR) and sleep score. Gym sessions are always protected first; optional sessions are the first thing you drop.

SIGNAL	WHAT YOU SEE	ACTION
GREEN	Slept 7+ hr, RHR within ~3 bpm of normal, lifts on track, legs not sore	Take the optional session. Keep it controlled.
AMBER	One flag: short sleep, RHR a bit up, legs sore, low motivation	Shorten it (60-90 min) or keep it easy. Skip if it is the 2nd amber in a row.
RED	Two or more flags: RHR up 5-7 bpm for days, poor sleep, lifts dropping 2 sessions in a row, joint pain, illness	Skip all optional sessions. Protect gym and sleep.

Optional-session rules while you are cutting

- Take **at most one** optional session per week. Both optionals in the same week only when recovery is green all week, or at maintenance calories.
- Never take the Wednesday optional badminton if Thursday's legs already feel heavy. Never take Monday's optional dance if you plan to take Wednesday's badminton too.
- Deload weeks (every 5-6 weeks): no optional sessions, and drop to 1 badminton and 1 dance session.

Weekly load

	SESSIONS / WEEK	APPROX. HOURS
Gym (4 x ~75 min)	4	~5 hr
Badminton doubles (2 x ~2 hr)	2 (+1 optional)	~4 hr (+2 hr)
Dance / Zumba (2 x 1 hr)	2 (+1 optional)	~2 hr (+1 hr)
Total	**8 (up to 10)**	**~11 hr (up to ~14 hr)**

Calories and fuelling (do not trust the watch's calorie number)

- A 2-hr session of recreational doubles realistically burns about **500-800 kcal** (watch totals of 1100-1400 are usually 20-40% high, and doubles has long standing/recovery periods between rallies). Zumba (1 hr) is about 300-500 kcal.
- Do not eat back the watch's number. Use your **weekly weight trend** as the truth: aim for a loss of ~0.25-0.75% of bodyweight per week.
- If weight falls faster than that, or gym strength drops for 2 weeks, add 200-300 kcal (mostly carbs) on badminton and dance days.
- **Before:** a carb-containing meal 1-3 hr before badminton, and a small snack (banana, dates, toast) 30-60 min before dance if training on an empty stomach feels bad. **After:** protein (30-40 g) plus carbs within 1-2 hr.
- Keep daily protein at 1.6-2.2 g per kg of bodyweight. Drink water through the 3-hr badminton window and add electrolytes (sodium) in hot weather.

03 Recovery, Injury Prevention & Sleep

What keeps you playing and lifting for years

Badminton (doubles) injury prevention

• **Warm up for 10 minutes before play:** easy jog, leg swings, side shuffles, bodyweight lunges, then arm circles and band shoulder work. Do not start cold.

• **Shoulder and elbow:** repeated smashes are the main overuse risk. Your face pulls and reverse pec deck in the gym protect the rotator cuff; wrist, hammer and reverse curls protect the elbow. If the shoulder pinches, ease off smashing.

• **Ankles and knees:** wear proper court shoes and replace them about every 6 months. Do 1-2 minutes of single-leg balance before playing. Front-court lunges load the knee and hamstring - split squats and leg curls prepare them.

• **Hamstrings:** on Tuesday they are fatigued from Day 2. Warm up well, and do not play at full intensity if they are very sore.

• **Back:** avoid forcing smashes with an arched lower back. Keep your core braced.

Dance (Zumba / studio) injury prevention

• Train on a sprung or wooden floor if possible and wear supportive trainers - repeated jumps on concrete beat up the knees and shins.

• Keep the first 10 minutes easy. Avoid locking knees on landings and keep knees tracking over the toes in squats and lunges.

• If you move to studio dance with more floor work or jumps, add 2 minutes of ankle and calf warm-up (heel raises, ankle circles). Calf strength is already covered by your calf raises 3x/week.

• Dance fatigue stacks with leg day, so dance on the 2nd half of the week stays at moderate intensity on gym days.

Sleep and recovery

• Aim for **7-9 hours**, with a consistent bedtime. Thursday and Friday dance ends around 8:30pm: eat dinner, wind down for 45-60 minutes, and do not stay up later because the next day is a gym day.

• Tuesday, Thursday, Friday and Saturday are your high-activity days. Sleep and food on those nights matter most.

• Wednesday and Sunday are full rest days: no cardio, no extra sessions (unless an optional is green). Light walking is fine.

• Take a short mobility session (hips, thoracic spine, shoulders, ankles) for 5-10 minutes on rest days.

Warning signs - stop and adjust

• Sharp, shooting or persistent joint pain (shoulder, elbow, knee, Achilles, ankle): stop that activity and reduce load. See a physiotherapist or doctor if it lasts more than 1-2 weeks.

• Lifts dropping for 2+ sessions, resting heart rate up 5-7 bpm for several days, poor sleep or constant fatigue: drop optionals, then trim the least useful isolation sets before cutting any gym day.

• Any chest pain, dizziness or fainting during activity: stop and see a doctor.

This plan is general fitness information, not medical advice. Check with a doctor before starting if you have a medical condition or injury.
